Moisture*	Approximately 12%
Ash	<0.5%

Note: Please note that while the above information is typical of THERMFLO, it should not be considered a specification, since the values may vary slightly between samples. All values are reported on an "as is" basis.

***Moisture:** The moisture content of all starches will vary, depending on environmental conditions during storage and manufacture. However, THERMFLO will generally have a moisture content of around 12%.

†Calories: The calories reported are based on the Atwater factor of 4 carbohydrates, calculated on an "as is" basis.

The information given and the recommendations made herein are based on our research and are believed to be accurate but no guaranty of their accuracy is made. In every case we urge and recommend that purchasers before using any product in full scale production make their own tests to determine to their own satisfaction whether the product is of acceptable quality and is suitable for their particular purposes under their own operating conditions. No representative of ours has any authority to waive or change the foregoing provisions but, subject to such provisions, our engineers are available to assist purchasers in adapting our products to their needs and to the circumstances prevailing in their business. Nothing contained herein shall be construed to imply the non-existence of any relevant patents or to constitute a permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of this patent.
